CIRCULAR NO. 18. REVISED.

United States Department of Agriculture.

SECTION OF FOREIGN MARKETS.

HAWAIIAN COMMERCE FROM 1887 TO 1897.

In the discussion now in progress relative to the proposed annexation of the Hawaiian Islands, one of the most important questions for consideration is that regarding the commercial aspect of the situation. It is the purpose of the present circular to review briefly the leading features of the foreign trade enjoyed by the islands, and especially of the trade relations they have established with the United States.

The calendar year 1896 marked the highest point yet attained in the commercial development of the Hawaiian Islands, the total value of the merchandise imported and exported through Hawaiian ports during the twelve months amounting to no less a sum than \$21,578,882.54. The highest value previously recorded—that for the year 1890—was \$20,105,030.61, or nearly one and a half million dollars less than the amount returned for 1896, while the average annual value for the entire decade 1887–1896 was as low as \$16,474,600.78. These figures afford some indication of the growing importance of Hawaii from the standpoint of commerce.

A striking feature of the Hawaiian trade is the remarkable excess of the exports over the imports. Of the \$21,578,882.54 returned as the valuation of all merchandise imported and exported during the year 1896, the sum of \$15,515,230.13 represented the value of the goods shipped from Hawaiian ports, while the commodities received at those ports from abroad were valued at only \$6,063,652.41. The imports in 1896 were therefore less than half as large as the exports, the balance of trade in favor of the islands amounting to \$9,451,577.72. This balance was an unusually large one, however, the gains made in exportation during 1896 being much greater than those made in importation. The average value per annum of the merchandise exported from Hawaiian ports during the ten years 1887–1896 amounted to \$11,052,141.34, and that of the merchandise imported to \$5,422,459.44, leaving an average yearly excess in favor of the exports of \$5,629,681.90.

The following table, compiled from the official trade returns presented in the annual reports of the Hawaiian collector-general of customs, shows the value of the merchandise imported and exported by the islands during each year of the decade 1887–1896:

Value of merchandise imported and exported by the Hawaiian Islands during each year from 1887 to 1896, inclusive.

Calendar years.	Imports.	Exports.			Excess of exports over imports.	Total imports and exports of merchandise.

Among the countries participating in the foreign commerce of Hawaii the United States is by far the most favored, enjoying fully 90 per cent of the entire trade of the islands. In the five-year period 1887-1891 the exact portion of the total trade credited to the United States was 91.20 per cent. According to the returns for the succeeding five years, 1892-1896, our share for that period was 91.92 per cent, showing that this country has more than held its own as a competitor for the Hawaiian trade. During the last calendar year (1896) the total value of our commercial transactions with the islands, as returned in the Hawaiian trade reports, aggregated \$20,924,306.35, the largest amount ever recorded. The highest figures previously reported were for the year 1890, and amounted to \$18,332,631.80. The lowest value of the decade was \$11,868,277.93, recorded for 1892. From the several annual returns just cited, it will be seen that our Hawaiian trade has been subject to some important fluctuations. The unusually high figures for 1896, however, indicate that the present tendency of the commercial intercourse between the two countries is one of expansion.

Of the total trade carried on between Hawaii and this country during the decade 1887-1896, 95 per cent, according to the Hawaiian official statistics, was conducted through our Pacific ports and only 5 per cent through our Atlantic ports.

After the United States, the country that enjoys the largest trade with Hawaii is Great Britain. Of the total commerce returned for the five-year period 1887-1891, the portion credited to the British amounted to 4.89 per cent. In the five years 1892-1896, however, their share was only 3.09 per cent, showing a somewhat marked decline in relative importance. The trade with Germany also declined during the decade, the portion credited to that country for 1892-1896 amounting to only 0.71 per cent, as compared with 1.14 per cent for 1887-1891. On the other hand, commercial intercourse with China and Japan increased considerably, the value of the merchandise exchanged with these two countries in 1892-1896 forming 2.49 per cent of the total trade value, as against 1.48 per cent in 1887-1891. The only other places separately specified in the Hawaiian official trade reports as enjoying commercial

intercourse with the islands are Australasia, Canada, the Pacific islands, and France. The commerce carried on with Australasia formed 0.86 per cent of the total trade in 1887-1891 and 0.88 per cent in 1892-1896, showing a slight advance in relative importance. That with Canada, although small, more than doubled in value during the decade. The trade between the Hawaiian group and the Pacific islands was unimportant, amounting to considerably less than 1 per cent of the total. This was also true as regards the Franco-Hawaiian trade, which has thus far been even smaller than that with the Pacific islands.

To show in greater detail the relative standing of these countries in the foreign trade of Hawaii, two tables are presented, exhibiting the annual value of the merchandise exchanged with each country during the years 1887-1896, inclusive. The statistics given are from the annual reports of the Hawaiian collector-general of customs. They cover the five-year periods 1887-1891 and 1892-1896, respectively, and are accompanied by annual averages and percentages for each period. The tables are as follows:

Total value of merchandise imported and exported by the Hawaiian Islands in their trade with the United States and other countries during the calendar years 1887 to 1891, inclusive.

¹ Including imports of specie during 1892-1896, valued as follows: 1892, \$655,912; 1893, \$983,631; 1894, \$608,700; 1895, \$374,233; 1896, \$1,100,909.

a Including merchandise carried in whale ships.

The above statistics regarding the relative standing of the several countries mentioned in Hawaii's foreign commerce have reference to

the combined import and export trade. A similar comparison, based solely on the value of the importations into the islands, is presented in the two succeeding tables. It will be noticed that the percentage credited to the United States is not so large in the case of the import trade as it was for the imports and exports combined, showing that this country is relatively a more important factor as a destination of Hawaiian exports than as a source of Hawaiian imports. During the past 10 years, however, our relative importance as a source of the merchandise imported into Hawaii has considerably increased, the value of the goods received from the United States in 1892-1896 constituting 78.54 per cent of the total imports, whereas in 1887-1891 it formed only 74.46 per cent. The imports from Great Britain during the same years suffered a material decline, the share credited to that country falling from 14.64 per cent in 1887-1891 to 8.71 per cent in 1892-1896. The importations from Germany also fell off, constituting 3.38 per cent of the total imports in 1887-1891 and only 2 per cent in 1892-1896. The most important gain, aside from that made by the United States, occurred in the case of China and Japan, the imports from these two countries advancing from 4.19 per cent in 1887-1891 to 6.80 per cent in 1892-1896. The official returns as to the value of the merchandise imported from the various countries during each year of the decade are as follows:

Value of merchandise imported into the Hawaiian Islands from the United States and other countries during the calendar years 1887 to 1891, inclusive.

¹ Including imports of specie in 1892-1896.

a Including merchandise carried in whale ships.

As regards the distribution of Hawaii's export trade, the United States has an almost complete monopoly, the value of the commodities sent to all other countries amounting to less than 1 per cent of the total valuation placed upon exported merchandise. An examination of the returns for the two five-year periods 1887-1891 and 1892-1896 shows that the exact portion of the export trade credited to the United States was 99.59 per cent in the first of these periods and 99.28 per cent in the second. The small residue of exported merchandise goes chiefly to Canada, the Pacific islands, China and Japan, Australasia, and Germany. The rapid increase in the shipments to Canada during 1892-1896 indicates that an export trade of some importance may be developed with that country. Full returns as to the value of the merchandise exported from Hawaii to the several foreign countries during each year from 1887 to 1896, inclusive, are presented in the two following tables:

Value of merchandise exported from the Hawaiian Islands to the United States and other countries during the calendar years 1887 to 1891, inclusive.

a Including merchandise carried in whale ships.

HAWAIIAN TRADE OF THE UNITED STATES.

From the foregoing statistics it is apparent that the commercial importance of the Hawaiian Islands is due almost entirely to their trade relations with the United States. The growth of these trade relations has doubtless been very largely assisted by the reciprocity treaty in force between the two countries since September 9, 1876. Under the terms of this treaty the principal exports of each country have been

admitted into the ports of the other free of duty, and this has naturally resulted in great advantage to the reciprocal trade.

The extent to which commerce between the two countries expanded under the reciprocity agreement is shown by the fact that during the ten fiscal years following the enactment of the treaty, 1877–1886, the average value per annum of the total import and export trade of the United States with Hawaii, according to our official statistics, amounted to \$8,797,949, as compared with only \$1,950,496 per annum during the ten years preceding the treaty, 1867–1876. This expansion was followed in the last decade by still further gains, the average value per annum of our Hawaiian trade during the ten fiscal years 1887 to 1896, inclusive, amounting to \$14,450,009.

The following table, compiled from the official returns of commerce published by the Bureau of Statistics of the Treasury Department, shows the value of free and dutiable merchandise imported, and of domestic and foreign merchandise exported, by the United States in our trade with the Hawaiian Islands during each fiscal year of the decade ended June 30, 1896:

Value of merchandise imported and exported by the United States in our trade with the Hawaiian Islands during each fiscal year from 1887 to 1896, inclusive.

Years ended June 30—	Imports.			Exports.			Total imports and exports.
	Free.	Dutiable.	Total.	Domestic merchan- dise.	Foreign merchan- dise.	Total.	
1887	\$9,892,889	\$29,186	\$9,922,075	\$3,520,593	\$101,436	\$3,622,029	\$13,544,104

Annual aver- age, 1887–96.	10,668,480	28,953	10,697,433	3,659,907	92,669	3,752,576	14,450,009

The above statistics as to the value of the merchandise imported and exported by the United States in our trade with Hawaii are somewhat at variance with the Hawaiian official returns of that trade given in preceding tables. This variance is explained in part by the fact that the figures in the official trade reports of the United States are for the fiscal years ended June 30, while the returns published by the Hawaiian Government are for the calendar years. A further explanation is found in the different methods employed in the two countries for arriving at the valuation of imports and exports. The statistics of both countries, however, show the same general trend of trade.

According to the official statistics of the United States, our total import and export trade with Hawaii during the fiscal year 1896 was valued at \$15,743,411. This value exceeded the return for the fiscal

year 1895 by more than \$4,000,000, and was larger than that recorded for any of the preceding years except 1889, 1890, and 1891. Of the total trade valuation for 1896, imported merchandise comprised \$11,757,704 and exported merchandise only \$3,985,707. As has already been explained, a very large proportion of the commodities imported from Hawaii is admitted into our ports free of duty. The imports subject to duty are extremely small, as will be seen from the comparative statement of the values of free and dutiable imports presented in the foregoing table. In 1896 the free imports amounted to \$11,743,343 and the dutiable to only \$14,361.

An examination into the character of the merchandise imported into the United States from the Hawaiian Islands shows it to consist almost exclusively of agricultural products. Commodities that may be classified as nonagricultural constitute in value less than 1 per cent of the total imports. The annual value of both the agricultural and non-agricultural merchandise imported and the exact percentage each of the two classes comprised of the total imports during the ten fiscal years 1887 to 1896, inclusive, is shown in the tabular statement presented below:

Imports of merchandise into the United States from the Hawaiian Islands classified as agricultural and nonagricultural.

Annual average, 1892-1896	9,321,741	99.31	65,185	.69	9,386,926

Of the various commodities imported into the United States from Hawaii, sugar is of paramount importance, comprising in value about 94 per cent of all the merchandise received from the islands during the ten years 1887-1896. The quantity imported in 1896 was considerably in excess of that returned for any of the earlier years, reaching as high as 352,175,269 pounds. The heaviest imports previously recorded were for the year 1894, and amounted to 326,574,584 pounds. The average importation per annum during the five-year period 1892-1896 came to 301,060,203 pounds, as compared with only 245,373,612 pounds in 1887-1891. Owing to a decline in the average export price, however, these important gains in the quantity of sugar shipped to the United States are not accompanied by corresponding advances in the total value of

the shipments. In fact, the average annual value of the sugar sent to this country during 1887-1891 was actually greater than that for 1892-1896, the former amounting to \$11,259,294 and the latter to only \$8,829,317. The highest value of the decade was \$13,152,724, reached in 1891, and the lowest \$7,403,658, returned in 1895. The value recorded for 1896 was \$11,336,796, the highest since 1891.

A comparison of the above figures with the returns for the two decades prior to 1887-1896 illustrates in a striking manner the remarkable growth of our imports of Hawaiian sugar under the operation of the reciprocity treaty that went into effect September 9, 1876. These returns show that during the ten years immediately following the enactment of the treaty, 1877-1886, our average importation per annum amounted to 95,011,345 pounds as compared with a yearly average of only 16,233,184 pounds during the preceding decade, 1867-1876. This extraordinary expansion was followed by a still further increase in the past decade, the average import per annum for the ten years 1887-1896 reaching as high as 273,216,907 pounds.

Molasses is also imported from the Hawaiian Islands, but not in any considerable quantities. During the past decade the importations have fallen off decidedly, the average shipment received per annum during 1892-1896 amounting to only 42,283 gallons, valued at \$3,905, as against an average yearly import for 1887-1891 of 74,352 gallons, valued at \$9,028. The quantity received during 1896 was returned at 33,705 gallons, and the value at \$1,902. This was the smallest import of the decade except that for 1894, which amounted to only 7,370 gallons, valued at \$653.

The following table gives the official returns as to the quantity and value of sugar of all kinds and molasses imported into the United States from the Hawaiian Islands during each fiscal year from 1887 to 1896, inclusive:

Quantity and value of sugar and molasses imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

After sugar the most important item among our imports from Hawaii is rice. It appears from the official returns, however, that the size of

the importations has dwindled very considerably during the last few years. In 1892-1896 the average quantity received per annum came to only 6,920,092 pounds, valued at \$293,334, as compared with 10,353,120 pounds, valued at \$468,725, for 1887-1891. The returns for 1896 were decidedly the lowest of the decade, amounting to only 4,354,500 pounds, with a value of \$163,571. Official statistics as to the quantity and value of rice imported during each fiscal year from 1887 to 1896, inclusive, are presented in the following table:

Quantity and value of rice imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Quantities.	Values.	Years ended June 30—	Quantities.	Values.
	<i>Pounds.</i>	<i>Dollars.</i>		<i>Pounds.</i>	<i>Dollars.</i>

1891	7,840,900	415,630	1896	4,354,500	163,571
Annual average, 1887-1891	10,353,120	468,725	Annual average, 1892-1896	6,920,092	293,334

Bananas rank third in value among the products imported into this country from the Hawaiian Islands. The largest shipments on record were received during the fiscal year 1893, amounting in value to \$126,583. Since that year the importations have declined somewhat, and in 1896 the value returned was only \$75,822. The annual average for 1892-1896, however, was decidedly higher than that for the preceding decade, amounting to \$98,785, as compared with \$84,672 for 1887-1891. Oranges and lemons are also specified among our imports from Hawaii, but neither of these fruits is shipped in any considerable quantities. The value of the bananas, and also of the total fruits and nuts, imported from the islands during each of the ten fiscal years 1887-1896 will be seen from the following figures:

Value of bananas and of all other fruits and nuts imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Bananas.	All other fruits and nuts.	Total fruits and nuts.	Years ended June 30—	Bananas.	All other fruits and nuts.	Total fruits and nuts.
1887.....	\$44,149	\$92	\$44,241	1892.....	\$110,317	\$11,491	\$121,808

Hides and skins constitute the fourth item in point of value among the commodities received from the Hawaiian Islands. During the past decade, however, the importations have suffered a rather pronounced falling off, the average value per annum of the shipments received in 1892-1896 amounting to only \$56,278 as compared with \$92,546 in

1887-1891. The value of the hides and skins imported into the United States from Hawaii during each fiscal year from 1887 to 1896, inclusive, was as follows:

Value of hides and skins other than furs imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Values.	Years ended June 30—	Values.

Coffee now occupies the fifth place as regards the relative importance of the commodities shipped to this country from the Hawaiian Islands, the importations having increased in a remarkable manner during the past ten years. In 1887, the first year of the decade, only 2,875 pounds of Hawaiian coffee, valued at \$437, were received at our ports, whereas in 1896, the closing year of the decade, our imports amounted to 131,343 pounds, valued at \$25,063. The largest importation on record was that for 1895, returned at 183,680 pounds, with a value of \$36,168. The average quantity imported per annum during 1892-1896 came to 90,886 pounds as against only 27,220 pounds during 1887-1891. As the Hawaiian coffee industry is still being developed with great rapidity, it is probable that our importations from the islands will continue to increase. The remarkable growth in our imports of coffee from Hawaii during the years 1887 to 1896, inclusive, is shown in detail by the following statistics:

Quantity and value of coffee imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

The only other product of any considerable importance shipped to the United States from Hawaii during the past decade was raw wool. The quantity imported has been subject to great fluctuations. Reviewing the annual returns for the decade, we find that in each of the years 1891, 1895, and 1896 more than 200,000 pounds were received at our ports, whereas in 1888, 1893, and 1894 no shipments whatever were recorded. The remaining years of the decade show importations varying in quantity from 454 pounds in 1890 to 162,370 pounds in 1887. Full returns as to the quantity and value of raw wool of the three dif-

ferent classes imported during the ten fiscal years 1887 to 1896, inclusive, are presented in the following tabular statement:

Quantity and value of raw wool imported into the United States from the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

As regards the nature of the merchandise exported from the United States to Hawaii, an inspection of the official returns for the past decade shows that the relative standing of the agricultural and non-agricultural commodities is very different from that disclosed in the case of our imports from the islands. In our export trade with Hawaii the preponderance is on the side of the nonagricultural merchandise as against the agricultural, and this preponderance seems to have increased during the last few years. Of the articles of domestic merchandise exported to the islands in 1887-1891, nonagricultural commodities constituted in value 69.32 per cent and agricultural products 30.68 per cent, whereas in 1892-1896 the nonagricultural exports comprised 70.79 per cent and the agricultural 29.21 per cent. The relative standing of the two groups of merchandise during each fiscal year of the decade 1887-1896 is shown in detail by the following figures:

Exports of domestic merchandise from the United States to the Hawaiian Islands, classified as agricultural and nonagricultural.

Years ended June 30—	Agricultural exports.		Nonagricultural exports.		Total exports.

Among the various products of agriculture exported from the United States to the Hawaiian Islands breadstuffs comprise by far the most

important group, constituting in value about 50 per cent of the total agricultural exports. During 1887-1891 our shipments of breadstuffs to Hawaiian ports reached an average annual value of \$550,522, and, notwithstanding the decline in prices, the figures for 1892-1896 were only slightly less, amounting to \$541,793. The leading item of the group, and in fact the leading single item among all the agricultural products, is wheat flour. Our exports of wheat flour to Hawaii have increased materially during the decade, averaging 54,152 barrels per annum during 1892-1896 as against 49,493 barrels per annum during 1887-1891. After wheat flour, barley is the most important of the breadstuffs exported to the islands, and in the case of this article also there have been increased shipments during the decade, the annual average advancing from 272,577 bushels in 1887-1891 to 310,488 bushels in 1892-1896.

Oats are shipped in considerable quantities, but the returns for the ten years 1887-1896 show a falling off during the latter half of the decade, the average export per annum for 1892-1896 amounting to only 59,756 bushels, as compared with 74,727 bushels for 1887-1891. The quantity shipped in 1896, however, was decidedly larger than for several years preceding. The exports of wheat, although not very extensive, made a noticeable gain during the decade, the returns for 1892-1896 showing an average yearly shipment of 13,204 bushels, as against only 11,824 bushels per annum for 1887-1891. Indian corn is exported in still smaller quantities than wheat, but like the latter grain shows a marked increase for the ten-year period. The average amount shipped per annum during 1892-1896 was 8,922 bushels, and that during 1887-1891 only 6,712 bushels. Bread and biscuit form an export of considerable importance, the shipments for 1887-1891 averaging 676,634 pounds per annum and those for 1892-1896, 701,147 pounds per annum, a material gain during the ten years.

The quantity of wheat flour, wheat, barley, oats, corn, and bread and biscuit exported from the United States to the Hawaiian Islands during each fiscal year from 1887 to 1896, inclusive, is stated in the following table:

Quantity of breadstuffs exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Next to breadstuffs, the most important category among our agricultural exports to Hawaii is that comprising the several meat products. The average yearly value of the meat products of all kinds shipped to the islands during 1887-1891 was \$102,095. In 1892-1896 the average value per annum placed upon these exports was not quite so high, reaching only \$99,942. Lard is the leading item of the group. In 1887-1891 our average shipments per annum of this article amounted to 278,482 pounds and in 1892-1896 to 311,228 pounds, showing a considerable gain. In the case of hams, the second item in the category, there was a slight falling off during the decade, the average yearly export for 1892-1896 amounting to only 177,930 pounds as compared with 184,777 pounds for 1887-1891. Bacon, on the other hand, made a small gain, the average shipment per annum increasing from 53,396 pounds in 1887-1891 to 54,811 pounds in 1892-1896. Our exports of canned beef to Hawaii experienced a remarkable growth during the decade, the quantity shipped per annum in 1892-1896 averaging as high as 164,750 pounds, whereas in 1887-1891 it was only 68,678 pounds.

In the following table complete returns are given as to the quantity and value of lard, hams, bacon, and canned beef, and also as to the value of the total meat products, exported from the United States to the Hawaiian Islands during each fiscal year from 1887 to 1896, inclusive:

Quantity and value of meat products exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

As regards the exportation of live stock from the United States to the Hawaiian Islands, the past decade has witnessed a rather marked falling off. The total value of the several species exported during 1887-1891 amounted to \$119,150 per annum, while in 1892-1896 it was only \$43,764 per annum. Mules, horses, and hogs are the principal kinds of stock sent to Hawaii. Cattle are shipped in smaller quantities and sheep only occasionally. In the exports of each of these varieties there has been a large decrease during the past ten years, as will be seen from the annual returns presented in the following table:

Quantity and value of live animals exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Cattle.		Hogs.		Horses.		Mules.		Sheep.		All other, includ- ing fowls.	Total live ani- mals.

In our shipments of dairy products to Hawaii there has also been a decline during the past ten years, although not so marked as that in the case of live stock. The total value of the three items, butter, cheese, and milk, fell from \$60,676 per annum in 1887-1891 to \$51,841 per annum in 1892-1896. The exports of butter, which amounted to

140,639 pounds per annum in 1887–1891, declined to 123,486 pounds per annum in 1892–1896. Meanwhile the cheese shipments fell from 96,704 pounds to 85,221 pounds per annum, and the value of the milk exported from \$16,405 to \$15,987 per annum. Annual returns of exportation for the three items separately, as well as for the entire group, are presented in the following table, covering the ten fiscal years 1887–1896:

Quantity and value of dairy products exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Vegetables form another class of agricultural products exported to Hawaii in considerable quantities. The principal kinds sent to the Islands are potatoes, beans and peas, and onions. All of these varieties were exported in larger quantities during 1887–1891 than in 1892–1896. Canned vegetables, which were also shipped to some extent, showed a similar falling off during the decade. The total value of the entire group declined from \$59,471 per annum in 1887–1891 to \$31,500 per annum in 1892–1896. Full statistics as to our annual exportation of vegetables to Hawaii during the ten years 1887–1896 are given below:

Quantity and value of vegetables exported from the United States to the Hawaiian Islands during the fiscal years 1887–1896, inclusive.

Years ended June 30—	Beans and peas.		Onions.		Potatoes.		Vegetables, canned.	All other, including pickles.	Total.

Our exports of wine to Hawaii are worth about \$75,000 per annum. Returns for the decade 1887-1896 show a considerable increase in the quantity exported, the average yearly shipments during 1892-1896 amounting to 133,243 gallons, as compared with 95,592 gallons during 1887-1891. The quantity and value of wine, bottled and unbottled, shipped from the United States to Hawaiian ports during each fiscal year from 1887 to 1896, inclusive, will be seen from the following statistics:

Quantity and value of wine exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Wine in bottles.		Wine not in bottles.		Total wine.

Hay is another agricultural product that is exported quite largely from the United States to Hawaii. The statistics of exportation for the two five-year periods 1887-1891 and 1892-1896 disclose an increase in the quantity shipped, the average export per annum having advanced from 4,939 tons in the former period to 5,675 tons in the latter. At the same time, however, there occurred a slight falling off in the value of the shipments, the yearly average for 1892-1896 amounting to only \$72,566 as compared with \$74,704 for the preceding five years, 1887-1891. The figures in detail are as follows:

Quantity and value of hay exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Quantities.	Values.	Years ended June 30—	Quantities.	Values.

In the five-year period 1887-1891 refined sugar was exported from this country to Hawaii to the value of more than \$75,000 per annum,

but during 1892-1896 there has been a marked decline in these exports, the average value of the shipments for the last five years amounting to only \$27,294. The quantity exported fell from 1,160,741 pounds per annum in 1887-1891 to 566,869 pounds per annum in 1892-1896. Following are the complete returns for each year of the decade:

Quantity and value of refined sugar exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Quantities.	Values.	Years ended June 30—	Quantities.	Values.

The only other item of any considerable importance among our agricultural exports to Hawaii is canned fruits. The exportation of this item, however, like that of refined sugar, was much larger during 1887-1891 than in 1892-1896, the average value per annum for the former period amounting to \$32,802, as compared with only \$19,554 for the latter. The following table shows the value of the shipments during each year of the decade:

Value of canned fruits exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Values.	Years ended June 30—	Values.

Annual average, 1887-1891	32, 802	Annual average, 1892-1896	19, 554

Among the nonagricultural commodities comprised in our export trade with the Hawaiian Islands, iron and steel and manufactures of, wood and manufactures of, cotton manufactures, leather and manufactures of, and manufactures of tobacco are of leading importance. These five classes of merchandise constituted in value more than half of our total nonagricultural exports to Hawaii during the ten fiscal years 1887-1896. Iron and steel and their manufactures form the principal group in point of value. Wood and its manufactures rank second, closely followed by manufactures of cotton. The exports of leather and its manufactures and of tobacco manufactures are about equally important. Annual returns as to the value of each of the above classes of merchandise exported from the United States to the

islands during the fiscal years from 1887 to 1896, inclusive, are presented below:

Value of leading nonagricultural products exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Iron and steel, and manufactures of.	Wood, and manufactures of.	Cotton, manufactures of.	Leather, and manufactures of.	Tobacco, manufactures of.
1887	\$405,382	\$416,651	\$318,286	\$174,193	\$99,990

Annual average, 1892-1896.....	473,266	306,545	297,103	141,348	164,479

Fertilizers also occupy a position of some importance among our exports to Hawaii. The shipments have increased to a large extent during the decade. In the fiscal year 1887 only 1,412 tons were sent to the islands, whereas in 1896 an exportation of 8,296 tons was recorded. The heaviest annual export was that for 1895, amounting to 10,168 tons. The average yearly shipments rose from 3,521 tons in 1887-1891 to 6,770 tons in 1892-1896, and the average yearly value from \$102,732 in the former period to \$203,364 in the latter. The quantity and value of fertilizers shipped from the United States to the Hawaiian Islands during each year of the decade 1887-1896 will be seen from the following returns:

Quantity and value of fertilizers exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Quantities.	Values.	Years ended June 30—	Quantities.	Values.
	<i>Tons.</i>			<i>Tons.</i>	
1887	1,412	\$36,527	1892	3,943	\$127,674
1888	2,992	78,653	1893	4,030	127,838

Annual average, 1887-1891	3,521	102,732	Annual average, 1892-1896	6,770	203,364

Other articles of considerable value that should be mentioned in a review of our exports to the Hawaiian Islands are fish and mineral oil. The exportations of fish amounted in value to \$129,011 per annum during 1887-1891, but declined to \$104,794 per annum in 1892-1896. A decrease also occurred in the case of mineral oil, the average annual value returned for 1892-1896 amounting to only \$79,476 as compared

with \$104,754 for 1887-1891. The exports during 1896, however, were larger than those for any other year since 1891. The value of fish of all kinds, including shellfish, and of mineral oil shipped from the United States to Hawaii in each fiscal year from 1887 to 1896, inclusive, is stated in the following table:

Value of fish and of mineral oil, crude and refined, exported from the United States to the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive.

Years ended June 30—	Fish.	Mineral oil, crude and refined.	Years ended June 30—	Fish.	Mineral oil, crude and refined.

To show in still greater detail the extent and character of the commercial transactions that have been carried on between the United States and the Hawaiian Islands during the fiscal years 1887 to 1896, inclusive, the following tables, exhibiting the quantity and value of all the principal articles of merchandise imported and exported by the United States in our trade with the islands during each of the ten years under consideration, have been compiled from the official returns of commerce published annually by the Bureau of Statistics of the United States Treasury Department. To facilitate comparison, the products of agriculture and the nonagricultural commodities have been collated in separate tables. As regards the agricultural products, the statements presented specify every article for which separate figures are available, while in the tables relating to the nonagricultural commodities only the more important items are separately stated. In the case of our imports from Hawaii the nonagricultural commodities are too unimportant to warrant a separate statement. The statistics given are so arranged as to cover the two quinquennial periods 1887-1891 and 1892-1896, respectively, and each table is accompanied by a statement of the annual averages for the quinquennium to which it relates. The tables are as follows:

Quantity and value of merchandise imported into the United States from the Hawaiian Islands during the five years ended June 30, 1891.

Unfortunately, the official returns of our trade with the Hawaiian Islands for the entire fiscal year ended June 30, 1897, are not as yet available. From records covering the ten months ended April 30, however, it is apparent that the commerce carried on between the two countries has been considerably augmented during the past year. A comparison of the state of our trade with Hawaii during the ten months ended April 30, 1896 and 1897, respectively, according to the official returns received by the Bureau of Statistics of the United States Treasury Department, is presented in the following table:

Value of merchandise imported and exported by the United States in our trade with the Hawaiian Islands during the ten months ended April 30, 1896 and 1897, respectively.

	Imports.			Exports.			Total imports and exports.
	Free.	Dutiable.	Total.	Domestic merchandise.	Foreign merchandise.	Total.	
Ten months ended April 30, 1896	\$7, 841, 840	\$10, 919	\$7, 852, 759	\$3, 325, 926	\$54, 085	\$3, 380, 011	\$11, 232, 770
Ten months ended April 30, 1897	10, 408, 440	22, 933	10, 431, 373	3, 711, 514	57, 225	3, 768, 739	14, 200, 112

From the above statistics it will be seen that our commercial transactions with the Hawaiian Islands during the ten months ended April 30, 1897, were larger by nearly \$3,000,000 than during the corresponding months of the preceding fiscal year, the total value of the merchandise imported and exported having advanced from \$11,232,770 to \$14,200,112. This gain is attributable chiefly to the growth of our import trade, the commodities received from Hawaii during the first ten months of the fiscal year 1897 amounting in value to \$10,431,373, as compared with \$7,852,759 for the same months of the fiscal year 1896. In the sugar imports alone there was an increase from \$7,471,400 to \$9,969,650. A considerable gain was also made in the case of rice. The imports of Hawaiian coffee, although less important relatively than those of sugar and rice, show a remarkable growth as between the two periods under consideration, the value returned advancing from \$22,647 to \$61,048. Following are the official returns as to the most important of the articles of merchandise imported into the United States from the Hawaiian Islands during the ten months ended April 30, 1896 and 1897, respectively:

Principal articles of merchandise imported into the United States from the Hawaiian Islands during the ten months ended April 30, 1896 and 1897, respectively.

Total imports		7, 852, 759		10, 431, 373

The growth in our export trade with Hawaii during the ten months ended April 30, 1897, as compared with the first ten months of the preceding fiscal year, while not nearly so great as that which took place in our importations, was nevertheless considerable, the value of the total exports, domestic and foreign, increasing from \$3,380,011 to \$3,768,739. Noticeable gains were made in the exportation of live stock, breadstuffs, wines, fertilizers, fish, cotton manufactures, leather and its manufactures, and wood and its manufactures. The most important falling off occurred in the case of iron and steel and their manufactures, mineral oil, and manufactures of tobacco. The tabular statement presented below shows the quantity and value of our leading exports of domestic merchandise to the Hawaiian Islands during the ten months ended April 30, 1896 and 1897, respectively:

Principal articles of domestic merchandise exported from the United States to the Hawaiian Islands during the ten months ended April 30, 1896 and 1897, respectively.
